

```
package com.proxy.dynamicproxy;

public class Manager implements Function {
    private String name;

    public Manager(String name) {
        this.name=name;
    }

    @Override
    public void eat() {
        System.out.println("吃饭");
    }

    @Override
    public void FormulateTarget() {
        System.out.println("目标");
    }
}
```
