

```
package com.proxy.staticproxy;

//真实对象
public class Manager implements Function{
    private String name;

    public Manager(String name) {
        this.name = name;
    }

    public String getName() {
        return name;
    }

    public void setName(String name) {
        this.name = name;
    }

    public void FormulateTarget(){
        System.out.println("指定一个小目标");
    }

    @Override
    public void eat() {
        System.out.println("吃饭");
    }
}
```
