

```
package com.proxy.staticproxy;

//代理对象
public class Secretary implements Function{
    private Manager manager=new Manager("云云");

    @Override
    public void FormulateTarget() {
        System.out.println("约定时间");
        manager.FormulateTarget();
        System.out.println("把访客信息备注");
    }

    @Override
    public void eat() {
        System.out.println("约定时间");
        manager.eat();
        System.out.println("把访客信息备注");
    }
}
```
