```java
package com.aop;

import org.springframework.aop.ThrowsAdvice;

import javax.servlet.ServletException;
import java.lang.reflect.Method;
import java.rmi.RemoteException;

//Schema-base方式
public class Mythrow implements ThrowsAdvice {
    //写一个即可

    public void afterThrowing(Exception ex) throws Throwable{
        System.out.println("执行异常通知-schema-base方式");
    }

    public void afterThrowing(Method m, Object[] args, Object target, Exception ex) {
        System.out.println("执行异常通知");
    }
}
```
