```java
package com.AutoInjection;

import org.springframework.context.ApplicationContext;
import org.springframework.context.support.ClassPathXmlApplicationContext;

public class Test {
    public static void main(String[] args) {
        ApplicationContext ac=new
ClassPathXmlApplicationContext("com/AutoInjection/applicationContext.xml");
        People people=ac.getBean("people",People.class);
        System.out.println(people.getTeacher());
    }
}
```
